Subject: RE: Paper for Coyote Station permit

Hi Patrick – This is a good start. Some of the dates may be off, at least the EPA letter was dated Nov 14th, not Oct 2nd. So you should QA some of the specifics. Before you involve OAQPS and the attorneys, I suggest you take a stab at explaining the petition/litigation situation including that ND has withdrawn the draft permit the petition was based on (or at least include a placeholder for one of the others to provide it) and it might be a good place to note that we have received a FOIA on this.

Also, it's important to include recommended next steps or options at the end. For that I would suggest reiterating that we recommend a management call with ND: **Ex. 5 Deliberative Process (DP)** with some short talking points that could be an appendix to the paper if it goes beyond a few bullets.

You can proceed with pulling in the others without further review from me.

Thanks for your efforts and have a fun weekend!

Gail

Hi Gail, here is a first draft of the briefing paper. I borrowed from some of Matt's comments on ND's latest submission and clarified and expanded as best I could. I imagine that Matt and Dan may have some edits to make as well as Sara, so maybe I should share it with them as well and compile all the edits? Let me know.

Subject: Paper for Coyote Station permit

Hi Patrick – Carl would like another briefing on Coyote before we have a management call with ND and requests that we provide a paper for that briefing. I'll get clarification on Monday who he wants to be included in that but I believe it would be essentially the same participants as we had this week (perhaps Dan substituting for Andrea since she is out on extended leave). I'm attaching the latest briefing package for Hunter. I think this provides a good example of the type of background information that would be helpful as well as the options paper. I wasn't finding that we had done anything formal for Coyote in the past, but if there is something I missed, it might be a better starting point. Please prepare the paper for my initial review. We'll want to get Sara's input and review too but please start with me. While the timing isn't currently critical, let's get the paper done and the meeting scheduled somewhat quickly while it's fresh in Carl's mind.

The new ARD admin assistant reports next week so I'll share information on that with the group and the protocol for getting meetings like this scheduled.

Thanks,
Gail
